

Why datonix is the key to unlock your data driven potential

Organize ready data for business users.

Transform data into beautiful stories.

datonix is a boutique of data experts. We deliver solutions and services for data driven enterprises turning information into valuable assets and improving data driven decision making.

**BUILD DATA STORIES AS FAST
AS BUSINESS
DECISIONS MAKING**

datonix

Supporting digital transformation

Today, it costs a lot of money to make data ready to be used in a data driven business initiative.

Moreover, preparation and discovery takes time and effort before the data asset can deliver analytical insights.

At the end of the day, there will be no time to implement the right data driven communication. Results will always be in delay, and apply changes to the data model would be tricky and struggling.

In such processes people with different profiles must work together, expensive equipment is required, and complicated software tools are necessary too.

These costs can quickly add-up, resulting in poor Value for Money, burdening the ROI calculation.

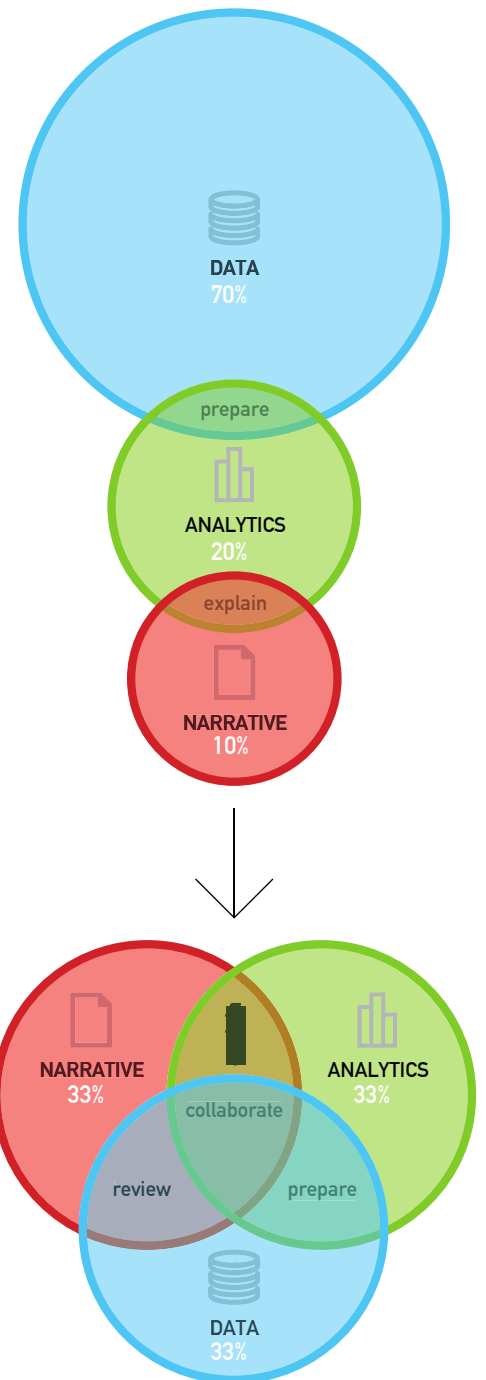

We want to reduce the time and costs to make data set ready to be used by the business, spreading the saved efforts for better analysis and storytelling.

datonix implements cost effective solutions to help clients to outsource data operations, analysis and reporting, to:

reduce total cost of ownership of data

deliver tangible results in production in a few of clicks

boost data processing performance

Want to collapse data unification, data journalism, data science and process analytics?

Our solution has been used in a wealth of applications including cloud migrations, IoT and I 4.0, information discovery, close and review of large set of data, data monetization and data sharing, data warehouse optimization, business intelligence, historical archiving, consolidation and master data management just to mention a few.

Datonix help clients to implement data stories in compliance of GDPR for Logistic, Procurement, CRM, Finance and Admin, Marketing and Sales, Security domains in Telecom, Media, Manufacturing, Public Admin, Banks.

Conceptualizing datonix capabilities

Want to test our solution? We offer many Poc options:

Trial, it is a free engagement which takes 1-2 days.

Challenge, It is a paid approach. Experiment takes 1-2 weeks

Epic, is full test bed paid delivery; a 12 weeks exercise with development of real production features. Customer can thereafter pass to implementation

Our mission

We simplify complex data into quickly readable and portable data set.

The result

Data are more used, in less time, at less cost and give fun along the way.

datonix
